DETAILED ACTION

1. Applicant's amendment and accompanying remarks filed October 18, 2007 are acknowledged.
2. Examiner acknowledges cancelled claims 23-43.
3. The rejection of claims 1-5, 10-14, 17-19, 46 and 51-53 under 35 U.S.C. 102(e) as being anticipated by Hsu, U.S. Patent Number 6,756,474 is withdrawn due to applicant's argument.
4. The rejection of claims 1-18, 23, 44-46 and 51-53 under 35 U.S.C. 103(a) as being unpatentable over McCormick et al., U.S. Patent Number 6,611,096 is withdrawn due to applicant's argument.
5. The rejection of claims 1-22 and 44-53 under the judicially created doctrine of obviousness-type double patenting as being unpatentable over co-pending application 10/814,917 is overcome by applicant's submission of the terminal disclaimer.
6. The rejection of claims 1-5 under the judicially created doctrine of obviousness-type double patenting as being unpatentable over U.S. Patent Number 6,756,474 is overcome by applicant's submission of the terminal disclaimer.

Double Patenting

7. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

8. Claims 1-22 and 44-53 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-7, 13-20, 23 and 30-38 of U.S. Patent No. 7,317,047. Although the conflicting claims are not identical, they are not patentably distinct from each other because both applications ~~recite~~^{claim} a composition comprising an aqueous dispersion of a polymer such as polyaniline and at least one colloid-forming polymeric acid such as perfluoroethylene sulfonic acid and another polymeric material such as polypyrrole. Reference claim 38 includes devices that comprise sub-pixel array which include a light emitting diode as required by the present claims. The patented reference discloses two or more polymers used in the aqueous dispersion. The patented reference does not disclose that the polyaniline ~~has~~^{has} the monomeric units as required by the present claims. The patented reference comprises the generic polyaniline and would encompass the polyaniline that has the monomeric units as required by the present claims.

Response to Arguments

9. Applicant's arguments with respect to the present claims have been considered but are moot in view of the new ground(s) of rejection.
